## **Columbia Avenue Redevelopment Project – Phase 2**

### **Weekly Update**

Last week Copcan focused on preparations for curb and gutters, sidewalk and driveway letdowns, and landscape and feature rocks. The contractor took a well-deserved long weekend.

Next week, you can expect to see the installation of:

- sidewalk and driveway letdowns;
- landscape nodes and feature rocks;
- bus shelter concrete pad; and
- road base gravel in preparation of asphalt

#### **Traffic**

Please slow down! The speed limit in the construction zone on Columbia Avenue is 30 km/hr.

Drivers should continue watching signs in the construction zone as the contractor is changing traffic patterns as needed to keep traffic flowing and ensure crews stay safe. Northbound traffic on 6<sup>th</sup> Avenue can now turn left onto 22<sup>nd</sup> Street to get back onto Columbia Avenue. The traffic is being carefully monitored to ensure minimal delays for travellers.

#### **Did you know?**

The bicycle lanes for this project were designed using the BC Active Transportation Design Guide which considers the type of corridor and users and the speed limit to suggest a safe and practical lane type.
