

# SPOTLIGHT

Did you know?

The City of Castlegar has acquired speed reader/indicator signs to assist motorists to adjust their speed to the posted speed limit

## The utilization of these signs reflects the City's commitment to public safety

- Over the past few years the City's Public Safety Committee has received concerns regarding vehicles speeding, especially in areas of the City where children are playing.
- Speed reader/indicator signs are designed to assist motorists in visualizing and reducing their vehicle speed to posted speed limits when travelling in neighborhoods where the signs are deployed. Data obtained will be utilized for safety statistics.
- The City's signs are LED solar powered and require very little power and sunlight to operate.
- Similar signs have been deployed and used in many communities with great success!
