Columbia Avenue Redevelopment Project – Phase 2

Weekly Update

Last week Copcan worked on line painting from 20th to 24th Street, installed a decorative fence along a retaining wall, installed cedar trees, and completed landscape tie-ins to properties along Columbia Avenue.

Next week, you can expect to see:

- installation of sod in boulevards between 22nd and 24th Street;
- installation of traffic signs throughout the entire project;
- finishing work grouting the inside of manholes and catch basins;
- placement of feature rocks within grass boulevards; and
- restoration of landscaping on private properties along Columbia Avenue.

Traffic

The construction site is seeing high volumes of traffic, much of which is moving quickly, so the detour along 6th Avenue will remain in effect another week to ensure the safety of workers.

Did you know?

Earlier this week the RCMP issued 15 tickets for speeding in the traffic zone and gave many warnings.
