## Columbia Avenue Redevelopment Project – Phase 2

### Weekly Update

Last week Copcan worked on landscaping and made various small adjustments to the project as they start to tidy up loose ends.

Next week, you can expect to see:

- additional landscaping;
- preparation for the installation of four sculptures;
- installation of overhead highway traffic signs throughout the entire project; and
- the contractor's presence in the community less obvious as they start to demobilize.

#### Traffic

The construction site continues to see very fast-moving traffic and we ask that drivers so down as we complete the final stages of the project.

#### Did you know?

The contractor has applied for Substantial Completion. This is a special contract term that means they have completed 98.7% of the work on the Columbia Avenue project. It is a big milestone for the Contractor and the City as it recognizes Copcan is very close to finishing the project.
